Morrison Rink Wins Second Prize in A.P. Competition, Calgary

The rink skipped by G. Morrison, playing in the Calgary bonspiel last week, won second prize in the Alberta Pacific Grain Co. competition.

Morrison and his men gave several fine exhibitions of curling and defeated some of the top notchers, but coming off keen ice at the Glenora and playing the final game on tough ice at the Calgary club, proved their undoing. They went down to defeat at the hands of the redoubtable Miquelon rink. The personnel of the rink was: T. O. Stephenson, Roy Anderson, S. A. Miller and G. A. Morrison, sk.

Annual Congregational Meeting at United Church Thursday February 4

The annual congregational meeting of the United Church (Oyen Pastoral Charge) will be held in the United Church, Oyen on Thursday, February 4, at 7:30 p.m. It is hoped that each field in the Charge will be well represented.

PUBLIC NOTICE

Notice is hereby given that a meeting of the electors of the Village of Oyen will be held at the Village Council Chamber at 7 o'clock p.m. on Monday the first day of February, 1932, for the discussion of the affairs of the Village and that from eight o'clock p.m. to nine o'clock p.m. on the same day and at the same place, Nominations for the office of councillor will be received.

One councillor is to be elected.
E. C. BLISS.
Oyen, January 20, 1932.

—MEMBER OF—

Members of Somme Chapter No. 35 O. E. S. Entertain at Social

Members of Somme Chapter No. 35, O. E. S., entertained in the Masonic hall, at a whist drive and dance, last Monday and a very enjoyable social evening was spent.

Prizes in the whist drive were won as follows: Miss J. Whitlock and Mr. H. J. Cooper won the first prize and Mrs. Caskey and Mr. D. A. Peck received the consolation awards. Music for dancing, played by the Oyen Serenaders orchestra, proved very popular.

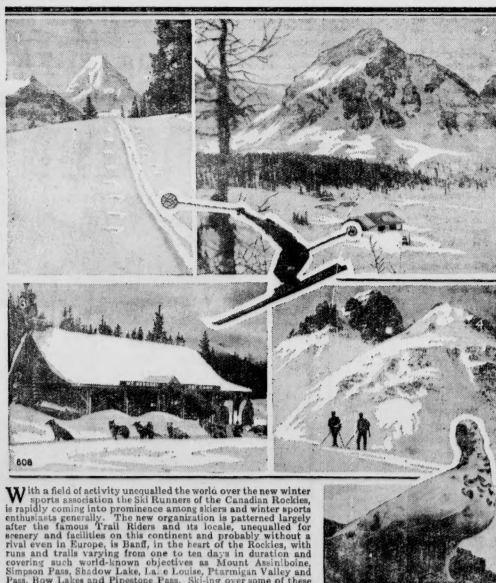

Bachelor Throws Tear Bomb into Ladies Camp at Tara Agricultural Fair. Former Resident of Oyen

For the first time in the annals of the Arran-Tara Agricultural Fair, a bachelor carried off first prize this year for the best fruit cake; truly a most remarkable feat, when you consider the large number of exceptionally good lady cooks in Tara and surrounding country. We would like to divulge this eligible bachelor's name, but refrain from so doing in order not to cause him any embarrassment. However we will give the ladies this tip that he once homesteaded on the prairies where he learned the art of domestic science. Can you guess his name?

Ski Runners of the Canadian Rockies

With a field of activity unequalled the world over the new winter sports association the Ski Runners of the Canadian Rockies, is rapidly coming into prominence among skiers and winter sports enthusiasts generally. The new organization is patterned largely after the famous Trail Riders and its locale, unequalled for scenery and facilities on this continent and probably without a rival even in Europe, is Banff, in the heart of the Rockies, with runs and trails varying from one to ten days in duration and covering such world-known objectives as Mount Assiniboine, Simpson Pass, Shadow Lake, La. a Louise, Parnassian Valley and Pass, How Lake and Pipestone Pass. Skiing over some of these passes is in full swing as late as June when skiers are enjoying golf and tennis, fishing and hiking, in the valley below. But the sport begins in November each year.

A thousand feet above Banff and about an hour out from the town is the ski lodge built on the pass between Mount Norquay and Stoney Squaw. From the club house runs radiate in all directions with cabins and shelters at strategic points for rest and refreshment. There is a 50-metre Jump at B. B. Park and every year in February (this year February 7-14) a tournament is held where the pick of Canadian and outside jumpers compete.

A lay-out shows (1) Ski track across virgin snow with Mt. Assiniboine, 11,800 feet high, in background; (2) Canadian Pacific Bungalow Camp at Moose headquarters for skiing at Mt. Assiniboine; (3) Mount Norquay Ski Lodge, 1000 feet above Banff, overlooking the Bow River, with dog team in foreground and (4) The Tower, on Wonder Pass, near Mt. Assiniboine, one of the finest winter scenes in the Rockies.

In Times Like These

In the course of the more or less extensive reading in which every man in newspaper work must engage, our attention was attracted by a magazine article bearing the title "In Times Like These," written by former U.S. President Calvin Coolidge. Coming from the pen of such a noteworthy man we felt assured that it would be a worthwhile article. We were not disappointed, and have decided to pass on to the circle of readers of this weekly column some of the thoughts expressed by the only living ex-President of the United States, in the hope and expectation that they may be found helpful and provide encouragement to others.

Mr. Coolidge expresses the opinion that one of the serious results that come from the experience through which the world has been passing for the past two years is "loss of faith," and he proceeds to show that if a man but keeps his faith, regardless of anything and everything that may happen, there is still a bright future before him.

The difficulty is that because some have put their trust in things which they have found do not always endure, they draw the hasty and unwarranted conclusion that it is useless to have faith in anything. Furthermore, there is a tendency, and it is easy, to conclude that whoever disavows may have overruled an individual for him to conclude that they have arisen through no fault of his own; rather that it is the fault of someone, and he is inclined to blame something he loosely calls society.

It is true that some have lost through the dishonesty of others. Many more have lost because they were tempted to take large risks in the hope of making large gains. Some did make large profits, but many more suffered heavy losses. Frankly, it must be said that those who trust to chance must abide by the results of chance. They have nobody to blame but themselves.

In Western Canada, however, probably the larger number of losers are to be found in Mr. Coolidge's third group, those who have sustained losses notwithstanding the fact that they have judgment and through causes he could know; that even when surrounded by all the safeguards and all the integrity which is possible to secure, the owners of the property involved, the man who has nothing more to risk; it is the man who has property who is liable to suffer. Nevertheless no sane person prefers to be the former rather than the latter.

The man who owns a house may lose it by fire, by flood, by a devastating storm. A man's health may sicken and die. A man may lose his crops by drought, or hail, or insect pests. World conditions may force prices to a level below cost of production. He cannot help these things, but that does not excuse him from making the most of what he has. The great fact of life is uncertainty, as Mr. Coolidge points out. The only thing we can do is to recognize the uncertainty and govern ourselves accordingly.

It might be a great personal comfort if we could lay all the blame for our misfortune upon some secure outside ourselves. That is why it is easy to convince some of us that we have not failed, but society has failed. But while there is a relationship of all of us, which we term society, that differs from each of us, just as a house differs from the individual bricks in it, yet people are not bricks, and moral responsibility cannot be shifted to others. If we are to be free to make our own choices in life, we must take the risk of being responsible for our own choices.

If we could lay the blame for present conditions in the world on society at large, against whom the blame is to be assessed? It is impossible to point out any general moral lapse, any widespread dishonesty. We may say it is the result of greed and selfishness. But what body is to be specifically charged with that? Were the wage earners too greedy in getting all they could for their work? Were the managers of enterprise, big and little, too greedy in trying to operate at a profit? Were the farmers too greedy in their production or in co-operating to get higher prices for their products?

No, the most we can say is that there has been a general lack of judgment so widespread as to involve practically the whole world. Each and every one of us must assume our full share of responsibility for that lack. We have found out that we were not so big as we thought we were. We were riding too high. We shall have to keep nearer the ground. We may not feel so elated but we shall be much safer.

We must realize that the best recipe for financial security is to live within our means. That is our ancient faith. We have found nothing better.

We must re-learn the old Biblical admonition: "Thine own right hand shall save thee." We must realize that Governments are not all-powerful; that present relief measures are but a crutch to help for a moment when we cannot otherwise help ourselves, but that our salvation, our whole future, rests with us as individuals.

There is no power that can absolutely guarantee us economic security. We think we want relief from toil and worry, forgetful that our real satisfactions are in our achievements. If we will but make the effort to develop them, if we will apply ourselves faithfully to our tasks, we shall all find we have powers we did not know we possessed.

Drop In Living Costs

Reduction Of Fifteen Per Cent. During Last Two Years

Cost of living has dropped by over 15 per cent. during the past two years, the Dominion Bureau of Statistics reports. This is the second largest decrease among the leading nations, the United States leading with a drop of 16.5 per cent. Germany ranks third with a 12.9 per cent. drop, Great Britain fourth with 11.6, and France fifth with 10.9 per cent. One of the reasons Canada, United States and France rank so high is the extensive agricultural developments of these countries.

The modern telephone instrument consists of 201 parts.

Palpitation of the Heart Could Hardly Get Around

Mr. Charles Storm, R.R. 6, Pelton, Ont., writes: "I was troubled with palpitation of the heart, couldn't sleep, day or night, and was so weak I could hardly get on my feet. After taking Milburn's Heart and Nerve Pills I was cured in a few weeks. My mother also has great faith in them and finds no other medicine can help her so much for heart trouble."

"I can assure you that Milburn's Heart and Nerve Pills are a wonderful medicine."

Bold at all drug and general stores, or mailed direct on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

Man Without a Country

Pitiable Plight of Negro Who Was Deported From Canada. Chained to a grating in the hold of a ship in port, where he has remained for more than a month, is another man without a country.

He is Cecil James Scott, 29-year-old negro deported from Canada and unwelcome in his alleged homeland of Bermuda. He was put on board the steamer "Boromdi" at Halifax, and when permission was refused to land him at Bermuda or Demerara where the authorities had information concerning him, the only alternative was to bring him back to Canada. Having previously been deported from the Dominion, he was refused admission when the "Boromdi" arrived at St. John, and now the captain and immigration officials are wondering what they shall do with the passenger.

The steamer's owners are liable to a \$100 fine if the portmaster escapes. So "down below," in an improvised cell formed by a grating, is the "man without a country," his right wrist fastened to the steelwork and a blanket serving for a bed.

Cut In Salaries

Manitoba Government Orders Six Per Cent. Reduction All Along the Line

Six per cent. cut in salaries of all employees of the inside government service, from cabinet ministers down to the lowest paid civil servant, were ordered by the Manitoba Government. The cuts were effective as from Jan. 1. This order will make provincial salaries cut the highest of any government in the Dominion.

It is anticipated that governing bodies of provincial service and educational institutions will follow the lead of the government and also corresponding cuts. A saving of \$100,000 is expected to result from the reductions.

Ship Fox Leaks

Seven Thousand Pints Leaks Quebec For London Market

During recent days 7,000 fox skins have been shipped from Quebec to be placed on the London fur market, according to information given out at the office of the Co-operative Fur Animals Raisers of the province's west. The shipment, which will be the largest ever sent out from here, is valued at \$200,000 and consists only of skins of the best quality.

In the face of the hand at present, Co-operative officials say, it is probable that an additional 13,000 skins will be placed on foreign markets in the very near future.

Persian Balm tones and stimulates the skin. Fragrant as a skin cream, as morning dew. Safeguards and beautifies the most delicately-textured skin. Cleanses the pores of exfoliate charm. Adds a subtle finish to the complexion. Revitalizes and softens the hands and makes them delicately white. Cool and refreshing. Ointment fragrant. Delightful to use. Chosen unhesitatingly by all women who care for feminine distinction.

Cannot Hear God

Viennese who have taken to forming gold in their mouths in the hold of fillings, crowns and bridge-work have bitten off more than they can chew. Firms which cast gold bridges and similar material for dentists have been doing a good business lately. The National Bank, which now has the sole right to sell gold, says temporary fillings will have to do until the gold crisis is past.

Toothache and neuralgia are instantly relieved by Douglas Eppley Liniment. A quarter of an ounce. Also recommended for rheum, sprains, sores and inflammation.

The total value of building and construction awarded in Canada during 1931, as compiled by Macdonald Building Reports, Limited, amounted to \$135,482,000. Ontario led with the province with \$125,452,500, or 93 per cent. of the Dominion total. Quebec comes next with \$106,125,700 or 82.6 per cent.

Land and Water Ferry Hotel guests at Devonshire, England, now use a ferry that travels on land or sea. It is equipped with tractor wheels for land, and a propeller is driven off the tractor motor to drive the ferry through water.

In 1807, the first rats of pine cut in the Ottawa Valley reached the City of Quebec.

Pulverism is a disease which attacks pulps in much the same manner as typhoid does humans.

Astrologer Makes Some Unpleasant Predictions

Says 1932 Hard Year For Cattle and Married People

Prof. Gustave Meyer, of Hoboken, New York, who describes himself as "the nation's counselor and American scientific astrologer," cast his eyes heavenward, and drew some startling figures and predicted that 1932 is going to be a tough year for cattle and married people.

In scanning the planets for his annual first-of-the-year forecast, Professor Meyer considers that Japan and China are going to have much trouble, and that Japan will get the best of it in the long run. He feels that prohibition is going to have "a terrible time" during 1932, that imperity is coming back to stay, that Colonel Lindbergh and Henry Ford had better watch their step in February and that next Fall there will be plenty of rain, snow, hail, thunder and lightning, floods, earthquakes, bank failures, broken legs and stomach trouble.

Among those who will suffer during the year, according to the professor, are, the theatrical people, hotel and restaurant people, steamship people, bull traders, naval officers and cabinet members.

Those who will enjoy good luck include literary people, scientific people, astrologers, mining men, real estate agents, President Hoover, soldiers, diplomats and all the unemployed.

Places Unknown To Man

Large Unexplored Region in Arctic and Antarctic Regions

Although the airplane, the motor car, the motor boat and other mechanical conveniences of recent years have helped wipe out many of the larger blank areas, marked "unexplored" on the maps of the world, the National Geographic Society, in a current bulletin, says there are still many regions traversed only once or twice in history and a few that have never been seen by civilized man.

"Unquestionably the largest unexplored spot in the world today lies in the continent of Antarctica," the bulletin states, adding that though the Pole has been reached three times, the coastline skirting of the interior only the pie-shaped sector leading inland from the shore of the Ross sea has been explored.

"Antarctica remains the greatest curiosity of man," it continues. "Next largest lies at the opposite end of the earth, that part of the Arctic Ocean between the alarship 'Norge's' path, on its flight over the North Pole and the coast of Siberia. It measures about 900 miles long and 400 miles wide, with an area about the size of Texas."

Large tracts in Greenland, Arabia, South America and Australia, have yet to be seen by man, the bulletin states.

Experiments are being made in Chicago, Ill., of a ray-producing device which, according to the inventor, will destroy ammunition on land, air, or sea at will.

Complete in itself, Mother Gray's Worm Exterminator does not require the assistance of any other medicine to make it effective. It does not fail to do its work.

Compressed air apparatus has been perfected to increase the volume and increase the quality of the tone from loud speakers of either radio or phonograph music.

The total expenditure by the different Provinces of Canada on main provincial highways during the year 1930 was \$34,502,750.

A new material for phonograph disks is capable of recording on one disk double the amount of music on an ordinary disk.

Shipping Gold To Britain

India Expected To Double Last Year's Entire World Output

India has shipped more than \$100,000,000 worth of gold to London since Great Britain suspended the gold standard, and if shipments are continued at the present rate they are expected to double last year's entire world output of gold which was approximately \$420,000,000.

More than \$8,000,000 in gold was shipped to London in one day recently. This steady output is regarded by financiers as an important contributing factor to the recent rise in the pound sterling.

More than in any other country in the world is the standard of value in India. All classes hoard it in the settings for jewelry, coins and other valuables, and banking systems are scarcely known in the Indian villages. Whenever an Indian in the interior takes paper money he ships his articles of gold to the government mint at Bombay where they are melted and coined.

New Ideas For Cars

Many Advanced Methods Will Feature Automobiles Of Future

The automobile industry, in its quest for new features to intrigue the buying public, spends millions of dollars annually in experimenting on advanced methods of automobile construction. Many of the ideas which result from the extensive research of the industry's engineers seem radical at first glance, but are a forecast of what may be expected for future automotive transportation. Among the many possible developments discussed in engineering circles is such a startling suggestion as a gasless, wireless car, propelled by radiated electricity. Another unusual proposal calls for the use of an airplane type of construction for cars, with large rotors and a combined rod and wing structure lifting a considerable amount of weight from the road, and with propulsion furnished by a propeller.

Then, there's Quik-Have, you remember that return to heat? No, that's Dr. Thomas' Electric Oil in the dressing. It will stop slugging, carry away the gross heat, draw out the pus and prepare a clean way for the new skin. It is a clear, cooler among oils and numbers of other certainties. It is held where property applied.

Forestry Patrol Work

Brooks Airways To Undertake Government Work In Northern Saskatchewan

Forestry patrol work and government flying operations in northern Saskatchewan will be conducted during 1932 by the Brooks Airways, Limited, of Prince Albert.

Arrangements for this work were completed between government officials and R. D. Brooks, head of the Airways. The Brooks Airways company similar work for the government during the past year.

At the present time the Airways is operating four machines, two Stinsons and two Buehls, with a staff of three pilots and two mechanics.

You're Worried

When your life is sick you're worried. Of course you can't always avoid sickness, but you can remedy and often prevent them with Baby's Own Tablets. They are the ideal laxative for children. Doctors prescribe them. Baby's Own Tablets reduce fever, drain, and clear your bowels, soothe the stomach, and help to clear up colds. 25 cents a package at any drug store.

Stockmen Elect Officers

Meeting Of Canadian Livestock Co-Operatives Held At Saskatoon. W. A. Amos, of Palmerston, Ontario, was elected president of the Canadian Livestock Co-Operatives at a meeting of the directors held at Saskatoon. He succeeds W. D. Mackay, of Saskatoon. Roy McPhail, Brandon, was elected vice-president of the organization. Directors for the provinces are: Alberta—J. E. Evanson, Taber; Saskatchewan—W. D. Mackay, Saskatoon; Manitoba—Roy McPhail, Brandon; Ontario—W. A. Amos, Palmerston; Quebec—J. T. Desmarais, Montreal; Maritime—J. McClellan, Prince Edward Island.

Real Benefit To Farmers

Shipping Club In Quebec Markets Produce To Advantage

A fine example of the real benefit to farmers in getting together to market their products is afforded by the results obtained by the Campbell Bay Shipping Club, of Pointe-Claire, Quebec. This year to date the club has marketed 250 head of cattle, 250 calves, 1150 lambs, and over 12,000 pounds of dressed poultry, representing cash returns to the farmers of that district of well over \$15,000. The Federal and Provincial Departments of Agriculture have co-operated effectively in making the scheme the a success.

Hard Times For Cret

A year ago Chef Francisco Arroyo was preparing delicacies for kings and queens, princesses, and princes. Today he labors over Spanish stew for the bread line. He replies to questioners with graceful Spanish casualness, as he manipulates pots and pans in the free kitchen maintained by the city.

Mexico may abandon her navy under an efficiency program soon to be put into effect by Secretary of War Plutarco Elias Calles.

Says Farmers Should Pay More Attention To Marketing Instead Of Concentrating On Production

Expressing the belief that the next 25 years would see the participation of agriculturists from domination by bodies outside themselves, H. S. Arkell, secretary of the Canadian Livestock Pool and president of the Canadian Society of Technical Agriculturists, speaking at a gathering of the latter organization at Saskatoon, asked their assistance in that regard.

The society had made great strides since it was formed in 1921, and now included most of the technically trained agriculturists of the Dominion.

In the past the members had chiefly concerned themselves with their own jobs and the co-ordination of work done under different authorities to make it efficient. They had accomplished a great deal in that direction.

But Mr. Arkell believed the time had come for the society to turn its attention to study the condition of agriculture. It is the condition of agriculture that they had received their training.

From the point of view of the farmer, the selling machinery under the old methods had failed them, the credit machinery had fallen down and they would find that the majority of farmers believed that the technical machinery of agriculture was failing to accomplish the purposes of the farmer.

Agriculture had taken care only of production and left someone else to take care of marketing. In all other businesses an increasing proportion of the brains was devoted to merchandising. Something should grow up in technical agriculture in regard to the business and so in production.

It was planned, the speaker said, to hold the annual convention of the society in Winnipeg in June, when it might be possible to secure speakers from the economic conference.

Dr. L. E. Kirk, Dominion Agrostologist, suggested that other businesses had perhaps devoted more attention to merchandising and persuading the people to buy what they did not want, rather than that agriculture had given too exclusive attention to production.

W. A. Munro, Eastern experimenter on farm, agreed that farmers in the present time were more concerned with what they were to do with what they had produced than with how to produce more or better articles.

Guests introduced at the gathering included: C. H. Bigler, Big River, spring wheat champion at the Chicago show, and Andrew Anderson, Alaska, recently designated "master farmer."

To Settle War Debts

Suggests Exchange Of African Territory Instead Of Cash Reparations To Sale

The rich Congo basin, lying in the heart of equatorial Africa, is proposed as payment by debtor countries in lieu of cash reparations to the United States, by Stephen Leacock, head of the Department of Political Economy at McGill University, Montreal, in an article appearing in the New York Herald-Tribune Sunday magazine section.

Describing this area of 1,500,000 square miles, now owned in its three divisions by Belgium, France and Great Britain, as "exuberantly fertile," Professor Leacock points to the great possibilities of development. He sees the great Congo River as the "real gateway for African trade," and says a real report at the mouth of the Congo would "become one of the great harbors of the world's shipping."

He says the United States with its money, machinery and brains, is the one country to undertake the great development. Thus would be set in motion, he believes, "a new world movement of prosperity."

"How did you get so much strength in your mouth?" "I have exercised my teeth with your steaks."—H. 420, Florence.

W. N. U. 1926

Greater Precipitation

Report Of Meteorological Service For Month Of December Is Encouraging

Precipitation in Saskatchewan over the cultivated portion, during December, 1931, was approximately twelve times that of December of the normal year, according to the report of the Dominion meteorological service for the month.

In average years, precipitation in Saskatchewan is from four-tenths of an inch to eight-tenths of an inch. During December, 1931, from one inch to one and a half inches was reported over a considerable area in Saskatchewan.

In the extreme southeast and in a small area to the east of the Cypress Hills several points were exceptions, reporting less than four-tenths of an inch of precipitation received during December.

Alberta replied in precipitation that was in excess of the normal. In December from one inch to one and a half inches was reported from a considerable portion of the plains. Usually the December precipitation in these areas varies from less than one-half to about three-quarters of an inch.

A dry December was the experience of Manitoba, where most sections reported less than half an inch and some less than one-tenth.

In the majority of years, December precipitation is slightly greater in Manitoba than in Saskatchewan, ranging from one-half inch to one inch—Regina Leader.

Apples Are Cheap Food

Essential Part Of Diet And Suitable For Every Meal

In a period like the present, when the amount of money available for food may be limited, apples are an essential part of the diet, says Miss Flora Carl, of the Missouri College of Agriculture. Apples are suitable for every meal in the day and are often enjoyed between meals also," she goes on. "As sauce or baked, apple serves as a breakfast fruit, and with bacon or sausage they may accompany the meat dish. For dinner they are especially good with fresh or cured pork, no matter how it is cooked. They are adapted to cooking with many vegetables, as baked with sweet potatoes, fried with carrots, scalloped with cabbage. A wide variety of salads may be made from apples, either raw or cooked with vegetables and the choice of apple desserts is almost unlimited."

Noise Affects Eyeight

One person in every five in the towns and cities is wearing, or ought to be wearing, spectacles. The proportion in the rural areas is only one in every 100. An eye specialist said:—"During the war one of the effects of shell-shock was a narrowing of the victim's vision. Perfect eyesight depends on perfect nerves, and town dwellers today are exposed to a nerve-shattering barrage of noise which differs only in degree from a great gun cannonade."

Neighbor: "Er—Mr. Brown—your've got odd stockings on." Mr. Brown: "Yes, dearie, that often 'appens to ladies 'what 'ave got more than one pair!"

A writer asserts that a man's character can be told by the books on his library shelf. Then most of our friends are bibliophiles.

THE NEW SPORTS BOOKS ARE EASILY MADE

You'll love to look at these smart sports bloomers. While they are quite roomy, they hug the figure through the hips. Elastic is inserted through the hem and the upper edge. Make in a jiffy! They are easily made in an hour. After they are cut out, just a few seams to join. Style No. 373 is designed in sizes 26, 28, 30, 32, 34 and 36 inches waist measure. The 30 inch size requires 1 1/2 yards of 36-inch material. Crepe de chine, crepe satin, and fine cashmere jersey are suitable. Price of pattern 25 cents in stamps or coin (coin is preferred). Wrap card carefully.

Death Ends Long Struggle

Fanny Hood, 80, who led the exclusion of her home only four times in 67 years after her father forbade her saying goodbye to her soldier sweetheart in the revolution of 1862, is dead at Binghamton, N.Y. Miss Hood shut herself in her home and read it only four times—each time for the funeral of a relative—during the ensuing 67 years.

An owl sleeps because his eyes are fixed immovably in his sockets.

Egg Exports From B.C.

Are Bringing Producers Over Five Thousand Dollars Daily

British Columbia hens are bringing into the pockets of poultry owners, as a result of growing volume of shipments of eggs outside the province, in the neighborhood of \$5,000 a day. The B.C. Egg Pool is shipping to the prairies and eastern Canada three and four carloads of eggs weekly. Private firms are adding further shipments, which, according to G. R. Wilson, of the poultry division, Dominion Live Stock Branch, bring the total up to one carload daily.

Each carload at Montreal brings an average of \$7,000. There must be deducted from this freight charges of approximately \$350 and handling charges of five cents a dozen.

The egg industry is at present the liveliest department of agriculture in British Columbia. Distribution of \$5,000 a day among poultry ranchers is a gratifying confidence in the poultry industry.

Egg prices are much lower than at the same time in 1930. Production is also lower. Nevertheless, present prices are attractive to the coast poultry owners. Lower feed prices and lower labor costs help to make up for the reduced prices received for the product.

George P. Wallace, president of the Egg Pool, reports falling off of production of eggs elsewhere in Canada.

Prof. E. A. Lloyd, University of British Columbia, says that the present export of eggs is but the beginning.

"I look to see British Columbia poultrymen exporting eggs to overseas markets as well as our domestic markets," said Professor Lloyd.

France Buying Wheat

French Government Contracting For Ten Million Bushels Of Canadian Grain

Delivery has started on a French government contract to buy 10,000,000 bushels of Canadian hard spring wheat, the United Press learns. The agreement represents a repetition of an order for a similar amount in 1920. Delivery will continue for two months.

It was understood that France expected a reciprocal concession from Canada favoring either French wines or apples, but no agreement has been reached.

It was estimated that France still requires 12,000,000 bushels of foreign wheat to meet the deficit in domestic supplies.

Wheat representatives were awaiting indications of whether the foreign office would continue the policy of buying Central European wheat for political reasons, or would buy the balance in the open market from Canada, the United States and Argentina.

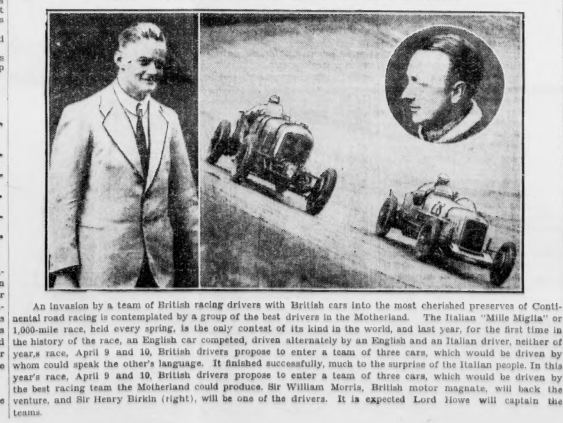

Advertising Always Pays

The business has not been found in which "advertising does not pay." What capital is in industry, what rainfall is to farm soil, advertising is to business. Advertising is as necessary to national distribution as the railroads.

The reason people are patient with statesmen is because they don't know what to do, either.

Nearly 40 irrigation projects are to be launched in Jugoslavia in the next four years.

BRITISH SPEED EXPERTS PLAN SERIOUS INVASION OF EUROPE

An invasion by a team of British racing drivers with British cars into the most cherished preserves of Continental road racing is contemplated by a group of the best drivers in the Motherland. "Mile Miglia" or 1,000-mile race, held every spring, is the only contest of its kind in the world, and last year, for the first time in the history of the race, an English car competed, driven alternately by an English and an Italian driver, neither of years race. April 9 and 10, British drivers propose to enter a team of three cars, which would be driven by whom could speak the other's language. It finished successfully, much to the surprise of the organizers. In 1929-30, the take was 134 times wheels and 12,717 coyotes.

Scientists Hope To Procure Facts And Figures To Test The Theory That Continents Float

Sensitive To Weather Changes

Animals Are Very Quick To Notice Any Variations In Weather

Animals are amazingly sensitive to changes of weather, and some very interesting observations have been made as to how they behave under such circumstances. We have all seen the antics cats get up to when a storm is approaching. They wander restlessly to and from, and suddenly dart about the house and garden in a most surprising manner. Cats, too, vouch right over their ears when rain is approaching. The following are other unmistakable signs of changing weather: In mountainous districts sheep change their feeding ground to the lee side, or side opposite the wind, of the hills before the arrival of gales and rain. Little field mice, too, appear to know when cold and snow will set in, for they have been observed to cover up their holes carefully before hard weather comes. Donkeys invariably bray lustily before rainy weather, and if bees return to the hive and do not come out again for a time rain is indicated.

Farm For Strayed Animals

Fifteen Acres Operated By Voluntary Workers In Montreal

"The League of Justice To Animals" with voluntary workers operate a farm of 15 acres at Montreal, the only kind of its kind in Canada, where lost, strayed or unwanted animals found on the streets of Montreal and environs are taken, and when not claimed within a reasonable time are placed with new owners. At this home there are adequate kennels for cats and dogs, stables for horses and good grazing land with plenty of shade trees. Every type of creature is cared for from goats to canaries. Horses whose owners are too poor to feed them, property are taken and within a short time returned in good condition.

In the society's six years of befriending the dumb animals, it has had four Christmas trees set up in various parks and squares here distributing hay, corn and oats to 100 horses yearly.

Fewer Wolves Taken

Export Of Wolf Pelts Shows Signs Of Falling Off

Production and export of wolf pelts are falling off, which opens up the question as to whether or not wolves are decreasing in Canada.

In the calendar year 1931 the export of the skins of wolves totalled \$172 at a value of \$355,670, according to the records of the Dominion Bureau of Statistics. In 1929 the export was \$67,008 wolf pelts at a value of \$1,950,870. In 1929-30 the take was 134 times wolves and 12,717 coyotes.

Built to house 100 guests, a hotel in Antrim, England, which is becoming quite a popular holiday resort, has not a single bathroom. The town itself has no public water supply.

Hidden away in vaults in Dominion

at Victoria and Ottawa are actual records that may prove or disprove some day the truth of the theory that North America and the other continents are not fixed or stationary.

The Austrian geologist who lost his life in Arctic exploration, laid down the theory that continents float on a sea of molten rock like rafts on a quiet ocean. Canadian scientists hope to supply the facts and figures that will determine the accuracy of the theory. Canada is vitally interested in settling the Wegener theory because Greenland is supposed to be the "speed king" among the continents, crawling westward at a rate estimated as high as six miles a year. Meteorological conditions, especially during the Labrador coast, the Maritime Provinces and the New England States, would be affected by any appreciable narrowing or lengthening of the distance between the two land masses.

Delicate scientific observations were made some years ago at the Dominion Government Observatories at Victoria and Ottawa. Longitudinal measurements were extended around the world with the aid of beam wireline. The pole stars of America, Greenland and other countries were plotted as minutely as possible. The observations will be repeated in 1933 and again in 1936, and any variation in the plottings will be noted. By this method it is hoped to establish the accuracy of Dr. Wegener's hypothesis.

The first evidence to substantiate the drifting theory was established in 1907 by J. H. Koch, German explorer. In 1912, after 10 years' work—Sir Edward Sabine, British scientist, made longitudinal observations in Greenland but when Koch took similar measurements in 1912, the figures did not correspond. The only explanation was that Greenland had drifted several miles toward North America in the intervening years.

Great Natural Asset

High Grade Clay Deposits In Saskatchewan May Prove Foundation Of Great Industry

One of the greatest natural assets of the prairie provinces is constituted in the high grade clays of northern Saskatchewan, says G. M. Hutt, assistant director of development for the Canadian Pacific Railway, speaking at a luncheon held by the officers' association of the company at the Royal Alexandra Hotel in Winnipeg. He said that they would in time be the means of support for an immense clay products industry.

In describing these valuable western resources, Mr. Hutt told of the general work of his department in obtaining Canada's clay industry by depositing of minerals and sources of other raw materials and by assisting in bringing these materials into use. W. C. Casey, president of the association, was chairman.

Royal Palace A Public Museum

Ex-King Alfonso's former royal palace at Madrid has been opened as a public museum. For the sum of one dollar visitors are allowed to see the throne room, sitting rooms, banquet hall, the famous "Hall of Columns," where so many functions, including that of the wedding of fest on Good Friday, took place, but so far they have not been permitted to visit the private apartments and bedrooms formerly occupied by King Alfonso, Queen Ena, and the Infanta.

At the National Dairy Show held recently at St. Louis, Missouri, U.S.A., a British Columbia two-year-old Holstein heifer, "Colony Field Columba," No. 194433, was declared Champion Holstein of North America.

"You are bandy-legged, Fritzi!" "That is nothing. You ought to have seen my brother. He was a bandy-legged that he had to be turned an old bandy in an En-Rillig Hail Timma, Othenburg."

CHAPTER XII.—Continued.

Jean, glancing enquiringly across at Mrs. Craig, was startled at the sudden change in her face produced by Lady Anne's simple announcement. The sallow skin seemed to pale—almost white, like a cut flower that needs water—and the lips that had been parted in a smile stiffened slowly into their accustomed straight line.

"Of course," Mrs. Craig's voice sounded flat and she swallowed once or twice before she spoke—"that must be it. I knew your father, Miss Peterson."

"To Jean, always sensitive to the emotional quality of the atmosphere, it seemed as though some current of hostility, of malevolence, leapt at her through the innocent-sounding speech, 'I knew your father.' It was quite ridiculous, of course, but the words sounded almost like a threat."

She had no answer ready, and a brief silence followed. Then Lady Anne bridged the awkward moment with some commonplace, noddingly steering the conversation into smoother waters, and a few minutes later Mrs. Craig rose to go.

"I'll see you across the park, Judith," volunteered Nick, and he and his mother accompanied her out of the room.

In the hall, Lady Anne detained her visitor an instant with a light hand on her arm, while Nick staggered for his own particular headache among the family assortment of hats and caps.

"Jean is a dear girl, Judith," she said earnestly, "I want you to be friends with her. Don't"—pleading—"visit the sins of the fathers on the children."

"Why, no, I shouldn't," replied Mrs. Craig, with apparent frankness. "It was only that, for the moment, it was rather a shock to learn that she was—that woman's daughter."

"Of course it was," acquiesced Lady Anne. "Goodbye, dear Mrs. Craig." But notwithstanding Mrs. Craig's assurances, a troubled look lingered in Lady Anne's grey eyes long after her guest's departure.

When PAIN Comes

WHAT many people call indigestion very often means excess acid in the stomach. The stomach nerves have been over-stimulated, and food sour. The cure is in an alkali, which neutralizes the acids instantly. And the best alkali known to medical science is **Phillips' Milk of Magnesia**.

One spoonful of this harmless, tasteless alkali in water neutralizes instantly many of the most distressing acids, and the symptoms disappear at once. You will not find any crude methods when you learn the efficiency of this. Go, get a small bottle to try.

We are sure for the genuine Phillips' Milk of Magnesia, prepared by physicians for 50 years in correcting excess acids, take a bottle—write to: **More, (Made in Canada.)**

CHAPTER XII. A Sense of Duty

Jean was immensely puzzled at the abrupt change which had occurred in Mrs. Craig's manner immediately upon hearing that she was the daughter of Glyn Peterson, and, as soon as the visitor had taken her departure, she sought an explanation.

"What on earth made Mrs. Craig freeze up the instant my father's name was mentioned? Did she hate him for any reason?"

Tormarin looked across at her. "No," he answered quietly. "She didn't hate him. She loved him."

Jean stared at him in frank astonishment. She had never dreamed that there had been any other woman than Jacqueline in Glyn's life.

"Mrs. Craig—and my father?" she exclaimed incredulously.

"She wasn't Mrs. Craig in those days. She was Judith Burke."

"Well, but—" persisted Jean, determined to get to the bottom of the mystery. "I still don't see why."

"Why what?"—unwillingly.

"Why she looked as if she loathed the very sight of me. That's not"—dripping—the quiet effect you would expect to produce."

"There was a curiously abstracted look in Tormarin's eyes as he made answer."

"Joy is productive of very curious effects on occasion. More particularly when it is without hope of fulfilment," he added in a low tone.

"Well, I suppose my father couldn't help not falling in love with Mrs. Craig," protested Jean with some warmth. "Nor could he have prevented her caring for him. And it's certainly illogical of her to feel any resentment towards me at that score. I had nothing to do with it."

"Love and logic have precious little to say to each other, as a rule," replied Tormarin grimly. "To Judith, who was the child of the woman who stole her lover away from her, so you can hardly expect her to feel an overwhelming affection for you."

"The woman who stole her lover away from her?" repeated Jean slowly. "I don't understand. What do you mean?"

He glanced at her in some surprise. "Surely—I don't know the circumstances?"

"She stole her head."

"No. I simply don't know in the least what you are talking about."

Tormarin made no response for a moment. He was standing with his back to the light, but as he lit a cigarette the flare of the match revealed a worried expression on his face, as though he deprecated the turn the conversation was taking.

"Oh, well," he said at last, evading the point at issue, "it's all ancient history now. Let it go. There's never anything gained by digging up the dry bones of the past."

Jean's mouth set itself in a mutinous line of determination.

"Please tell me, Blaise," she reiterated. "As it is something which concerns my father and a woman I should like to be meeting fairly often in the future, I think I have a right to know about it."

He shrugged his shoulders resignedly.

"Very well—if you insist. But I don't think you'll be any happier for knowing." He paused. "Still, I confess."

She bent her head.

"Quite—firmly—whatever it is, I'd rather know it."

"On your own head be it, then." He seemed trying to infuse a lighter element into the conversation, as though hoping to minimise the effect of what he had to tell her. "It was just like this—that your father and Judith Burke were engaged to be married at the time he met your mother, and that—well, to make a long story short, he ran away with Miss Mavery on the day fixed for his wedding with Judith."

A dead silence followed the disclosure. Then Jean uttered a low cry of dismay.

"My father did that? Are you sure?"

"Quite sure."

Tormarin could see that the story had distressed her. Her eyes showed hurt and bewilderment like those of a child who has met with a total unaccountable disappointment.

"Don't take it like that!" he urged hastily. "After all, it was nothing so terrible. You look as though he had broken every one of the ten commandments"—smiling.

Jean smiled back rather wistfully.

"I don't know that I should worry very much if he had—in some circumstances. But—don't you see—it was so cruel, so horribly selfish!"

"You've got to remember two things in justification—"

"Justification?"—expressively.

"There wasn't any. There couldn't be."

COULDN'T COMB HAIR

Crippled by Rheumatism

"I had been suffering with rheumatism for about 2 years, and about this time last year was laid up for 10 weeks. My back and some limbs were the worst affected. I could not get about at all. I could not wash my face or comb my hair. All this had to be done for me. At the beginning of this year I started taking Kruschen Salts every morning and I am pleased to say I am now able to wash and comb to my own liking and can go out in the fresh air without it affecting me."—Mrs. P. K. K.

Rheumatism is associated with an excess of Uric Acid in the system. Two of the ingredients of Kruschen Salts have the power of dissolving uric acid so as to render it capable of being easily excreted out of the system. Other ingredients of Kruschen assist Nature in flushing out this dissolved uric acid through the bowels and the kidneys. Other ingredients still, prevent food fermentations taking place in the intestine, and thereby check the formation not only of uric acid but of other impurities which poison the blood and pave the way to ill-health.

"Well, excuse, then, if you like. One thing is that Jacqueline Mavery was one of the most beautiful of women, and the other, that your father's engagement to Judith had been broken."

"No nation can prevent this deflation, the memorandum contends, and the only group strong enough to take effective measures is the British Empire, within which members would insulate themselves from external competition while re-expanding their power."

"But on her wedding-day"—pitifully. "Oh! Poor Judith!"

Tormarin smiled a trifle cynically. "That was the root of the trouble. It was Judith's pride that was hurt as well as her heart. She married Major Craig because she believed they were really fond of one another and comparatively happy. But she has never forgotten Peterson from that day to this. And you, being Jacqueline Mavery's daughter, will come in for the residue of her bitterness."

"Unlucky"—ironically—"you can make friends with her."

"I shall try," said Jean simply. "My father's living now?"

"No. He died out in India, and after his death Judith came back to England. She has lived at Willow Ferry with her brother, Geoffrey Burke, ever since."

There was a long silence, while Jean tried to fit in the new facts she had just learned. "So she died out in India, and after his death Judith came back to England. She has lived at Willow Ferry with her brother, Geoffrey Burke, ever since."

There was a long silence, while Jean tried to fit in the new facts she had just learned. "So she died out in India, and after his death Judith came back to England. She has lived at Willow Ferry with her brother, Geoffrey Burke, ever since."

happiness at the cost of someone else's right?"

A look of extreme bitterness crossed Tormarin's face.

(To Be Continued.)

Uniform Monetary System

Proposed That Effective Measures Be Taken By The British Empire

A memorandum strongly advocating the introduction of a uniform monetary system for the British Commonwealth of Nations was adopted by the Federated Chambers of Commerce of the British Empire.

The memorandum declares since most empire countries are now off the gold standard the struggle to attract and retain gold has become acute. But, in order to remain competitive in the world's markets, the nations are obliged to force down prices by currency contraction which has led to similar contractions by other nations, neutralizing the first advantage and depressing prices below the cost of production.

This, the memorandum says, has reduced the purchasing power of 91 per cent of the world's population. So-called over-production, it continues, is really under consumption, owing to restricted purchasing power.

No nation can prevent this deflation, the memorandum contends, and the only group strong enough to take effective measures is the British Empire, within which members would insulate themselves from external competition while re-expanding their power.

Ekismen Feed Depression

Low Prices Obtained For Furs Is Causing Harshness

Ekismen, living in Canada's vast hinterland stretching from the 50th parallel to the north pole, are suffering severely from the depression and were it not for their unselfish co-operation, conditions would be much more acute. Such was the information brought by Bishop A. Turquilli, known throughout the continent as the "Bishop of the Arctic," who arrived in Montreal from his bishopric of the snow where for 30 years he had labored in the interests of the natives.

Bishop Turquilli has been called to Montreal to be made vicar apostolic of Hudson Bay.

His lordship stated the Ekismen and trappers were, with the rest of the north, the depression keenly. Fur, he said, were not bringing very high prices and as this was practically the only thing the northern people had to sell, it was very difficult to obtain even their simple needs.

His discourse, the most unique in the world, stretches over an area of 1,652,698 square miles and his parishioners in this vast area number 7,500.

In all infantile complaints that are the result of the depredations of worms in the stomach and intestines Miller's Rose Powders will be found the effective remedy. They attack the cause of these troubles, and by expelling the worms from the organs insure an orderly working of the system, without which the child cannot maintain its strength or thrive. These powders mean health and improvement.

New Treatment For Anaemia

Scientists Claim Extract Injection Will Combat This Trouble

A new and simplified treatment for pernicious anaemia eliminating many of the uncertainties and difficulties of present treatments, has been perfected by research scientists at University of Michigan.

The new treatment involves intravenous injection of concentrated liver extract and obviates the necessity of frequent doses of liver extract or substitutes administered by mouth against which patients rebel.

Single injections of the new extract into the veins of a pernicious anaemia sufferer have restored the blood to normal. After the blood has been replenished with red corpuscles, it is possible to maintain this state by single injections at intervals of from four to six weeks.

A man who marries for money cannot get along with or without his wife.

There are more than 40 different kinds of insulating materials used in house construction.

When You CAN'T SLEEP

Fatigue is the signal to rest. Obey it if you can. When you can't, keep cool and carry-on in comfort.

Aspirin was meant for just such times, for it restores your comfort. Freedom from those pains that nag at you and wear you down. One tablet will block that threatening headache while it is still just a threat. Take two or three tablets when you've caught a cold, and that's usually the end of it.

Carry Aspirin tablets when you travel. Have some at hand when you keep some at home. Like an army secretary, they will often "save the day" and spare you many uncomfortable, unproductive hours.

Aspirin is harmless, so keep it handy. Keep it in mind, and use it. No town of affairs can afford to ignore the score and more of uses probed in the proven power of Aspirin. From a grumbling tooth to those stomach aches which seem almost to bend the knees, Aspirin tablets are ready with quick relief—and always work. No trifling. No fuss. No nagging, needless pain.

Get the genuine tablets, stamped with the Bayer cross. They are of perfect purity, absolute uniformity, and have the same result every time. Why experiment with imitations of this? But there is one more thing to look for. There is too much at stake. Buy the genuine Aspirin tablets in the large box.

Made in Canada

Tablets Aspirin

Gillespie, Mr. R. C. Anderson
and Mr. T. O. Stephenson re-
turned from Calgary last Sun-
day.

Look at your address label!

Alex. R. McTavish Sight Spec-
ialist, will visit Hotel, Sibbald,
Wed. Feb. 3rd, and Hotel, Oyen,
Thur. Feb. 4th. The most depen-
dable eyesight service at
reasonable prices.

Mr. M. G. Whitlock, who skip-
ped the Bishop rink at the Cal-
gary bonspiel, returned to Oyen,
Saturday.

A whist drive and dance will
be held in Oyen Theatre on Fri-
day, February 12, by the ladies
curling club. Music for the
dance will be played by the
Oyen Serenaders. Refresh-
ments served. 50 cents a ticket.
Everybody come.

Mr. Wm. Walsh and Mr. S. A.
Miller returned to Oyen last
Sunday.

A meeting of the Oyen Dis-
trict Builders Association will be
held in Oyen on Thursday, Feb-
ruary 4, at 2:30 in the afternoon,
in the municipal office. A good
attendance is asked for.

WITH THE CURLERS

The Geo. Langmuir rink,
playing in the Alaska bonspiel,
which is in progress this week,
won their first two games in the
Citizen's event. They played
this afternoon to into the jew-
ellery, but lost. The personnel
of the rink was: G. Langmuir,
sk., A. E. Johnson, H. McMur-
ray and A. O. MacArthur.

M. G. Whitlock, G. A. Morri-
son, Roy Sharp and Louis Gil-
lespie, lost their games in the Cit-
izen's event.

Church Notices

SUNDAY, JANUARY 31

ALL SAINTS CHURCH

Evensong 3.00 p.m.
Rev. C. M. K. Parsons
Vicar.

OYEN UNITED CHURCH

OYEN 7.30 p.m.
Rev. E. F. Kemp
All Are Cordially Invited

muir, sk. J. Marshall, H. Mc-
Murray (and Any Lee and A.
O. MacArthur. The visitors re-
turned home victors.

Roy Sharp and his colts
whose play in the New Year
competition enabled them to
lift the Hobberlin cup, have
twice successfully defended
their trophy. They appear to
be very much of a going con-
cern. (I'll say they are!)

Mr. J. J. Purcell left for Cal-
gary yesterday morning to
spend a few days in the city.

Dr. J. M. Harvey
